

Programme Management from SPL ensures smooth, streamlined and effective business transformation – via tailor-made, cost-effective delivery designed to deliver maximum bottom-line benefits

Programme Management from Symbiotic Projects

Business transformation is seldom delivered by the application of Project Management alone – and where benefits arising from a particular business project have been identified, SPL's Programme Management service is designed to maximise the likelihood of achieving those benefits once the project has been delivered. Operating in a flexible, cost-effective manner, our Programme Management perfectly complements our Project Management offering and represents a uniquely cost-effective way of delivering effective business transformation.

The value of individuals with experience

While all SPL's Programme Managers have received Programme Management training (such as MSP), clients often actively seek individuals who have had many years' experience in leading programme teams and dealing with people. It is generally recognised (particularly in the IT sector*) that whilst Programmes are certainly concerned with the application of Project Management techniques, they are far more about dealing with emotional, cultural and political issues.

A flexible, tailored approach

Unlike many other organisations within the marketplace, SPL provides Programme Management services that deliver a unique commercial solution to business transformation; most Programme Management organisations expect the client to engage a Professional Services resource on a full-time basis for a period of months or even years, often resulting in unnecessary costs. Whilst SPL is happy to meet such fixed-term engagements, our flexible approach allows for a tailor-made approach that also ensures economies of scale and minimisation of costs - to the ultimate benefit of our valued clients.
