“Quality is never an accident; it is always the result of intelligent effort”

John Ruskin 1819-1900

M & E Solutions

from Symbiotic Projects

Top class
workmanship

Our comprehensive range of professional skills enables us to offer a bespoke service. These skills are enhanced by the positive attitude we bring in resolving any challenges our clients bring to us. Our commitment is to do what it takes to deliver the best results for all of clients across all industry sectors, technologies and skill disciplines.

Fit for Purpose
Solutions

Our skilled Project Managers and designers have a wealth of experience in the HVAC industry. We have invested in the latest information technology to ensure that your project is delivered on time, to specification, and within budget.

Our Project designers will select the most appropriate equipment for your installation. They will plan and control all aspects of the contract, structuring the project to fully satisfy our clients needs throughout the life of the contract.

Professional
Project Management

SPL M&E would be pleased to undertake a comprehensive site survey and produce a detailed written report on the condition of existing systems and plant. This service is available on all types and makes of equipment and can be carried out in most cases during normal office hours to avoid any disruption to our customers operations.

SPL M&E plan and control all aspects of plant upgrades and refurbishment projects, being supported by its Project designers who are skilled to be able to advise regarding the most suitable and cost effective solution to your problem.

Leading
Manufacture
Equipment

With the equipment choice being made from leading equipment manufacturers coupled with many years of experience, SPL M&E is able to deliver the right solution – whether it be a straightforward heating or comfort cooling installation, or a close control environment required within a Telecommunications site, laboratories or clean room projects.
